Kai Rho directors Rowena Leslie and Katrina Stubbs are always looking for ways to buy loKal. So when a recent decision to purchase artwork for the Kalgoorlie office was made, there was no doubt about who would be the supplier - local aboriginal artists! That part of the process was simple, but getting two people to agree on a piece of art is not as easy. Yet when the pair saw "The Seven Sisters" painting by local artist Renata West, they knew their search was over. The painting tells the *Thukurrpa* (dreaming story) of the seven sisters star cluster, who travelled to earth from the heavens. They liked to create beautiful wildlife, plants & flowers, waterholes, but when a *wati* (law man) tried to take a sister for a wife, the seven sisters ran away back into the sky. The seven sisters are also represented in the Kai Rho logo.

On The Road

September marks the start of spring and if you happen to be travelling on the outback roads you will get to see the beautiful wildflowers of this red dirt country. You may also happen to see Kai Rho workers maintaining the roads working with new client, DM Roads. This month Kai Rho will sign a service agreement with the road works giant, owned by Downer EDI, to provide labour hire for the many different maintenance crews on the Goldfields network roads. Be sure to give us a wave!

FUN FACT: Kai Rho Contracting is the trading name for Hamlet Resources Pty Ltd. Hamlet Resources began trading on 4th December 2013.

FROM LITTLE THINGS

Kai Rho new machinery has arrived onsite at Tropicana Gold Mine. One UD Condor 6x4 14,000L Water Cart arrived onsite on the 2nd August 2019, along with two light service vehicle, a Toyota Landcruiser Workmate 4-door and a Toyota 12 seater commuter. The Tropicana team were excited to receive the new machinery and eager to get a group photo with KW01 Water Cart. Six years earlier Kai Rho had its very first piece of machinery, a Hino 6x4 15,000L Water Cart, with Ryan Stubbs in foreground (see photos below). Through persistence and hard work our little company grows!

Kai Rho's first equipment was a water cart bought in December 2013.

Kai Rho's most recent purchase, a water cart, delivered onto site August 2019.
